PROFESSIONAL SUMMARY

Systems Engineering student at EAFIT with 1+ years of professional experience specializing in Full Stack and Mobile (Node.js, React, Flutter). I build production-ready systems that automate everything from daily logistical workflows to complex, real-time integrations. Leveraging AI/LLMs, I optimize architectures, orchestrate APIs, and eliminate manual bottlenecks to ship low-latency, efficient code.

EDUCATION

Bachelor of Science in Systems Engineering (currently in 7th semester)
Universidad EAFIT

2023-2027
Medellín, Colombia

WORK EXPERIENCE

Mobile Software Engineer (Freelance) (Remote)
Grupo Punto Corea

Apr 2025 – Nov 2025
Medellin, Colombia

- Led digital transformation via a Flutter/Node.js B2B app, digitizing 100% of manual order-taking workflows.
- Reduced fulfillment time by ~50% automating communication between field agents and logistics.
- Empowered sales teams with real-time data, reducing manual errors and improving close rates.
- Engineered a fault-tolerant Node.js backend achieving 100% accuracy and zero duplicate orders.

Full Stack Software Engineer (Freelance) (Remote)
Zona Repuestera

Oct 2025 – Dec 2025
Medellin, Colombia

- Led WhatsApp e-commerce integration (Django/Node.js), scaling capacity for high-volume traffic.
- Decreased support workload by ~60% automating routine inquiries, quotes, and shipping updates.
- Enhanced response times via an Express.js WebSocket panel for zero-latency bot-to-human handoffs.
- Reduced operational overhead optimizing system architecture and media processing for peak uptime.

PROJECTS

Infinito Piercing Automated Catalog | Node.js, Express.js, Puppeteer, Shopify API

- Automated manual catalog creation by engineering a desktop executable that fetches real-time Shopify data to instantly generate professional PDF collections.

Gráficas Diamante Corporate Website | Next.js, React, TypeScript, Tailwind CSS, Framer Motion

- Modernized the company's digital presence by building a high-performance, SEO-optimized web application, delivering a fast and engaging user experience.

Valorant Pro eDPI Analytics | Python, BeautifulSoup4, JavaScript

- Centralized competitive gaming metrics by developing a web scraper that extracts professional player data, visualized through a custom JavaScript dashboard for real-time eDPI analysis.

TECHNICAL SKILLS

Languages | JavaScript, TypeScript, Dart, Python, Java, SQL, HTML/CSS

Frameworks | React, Next.js, Flutter, Express.js, Django

Developer Tools | Node.js, Git, Render, Supabase, SQLite, AWS, Docker, Vercel

Libraries | Tailwind CSS, WebSockets, FFmpeg, WhatsApp Business API, Shadcn/ui, Styled Components

LANGUAGES

Spanish (Native), English (B2 certified by IELTS)
